Personal Statement

As a highly skilled IT Specialist with growing expertise in front-end development using React and JavaScript, I bring a wealth of experience in optimizing user interfaces and building dynamic, responsive web applications. My technical background spans across network system support, transaction processing, and innovative software solutions. I thrive in dynamic environments where I can leverage my expertise to contribute to technological advancements, particularly in web development, payment solutions, and cloud technologies.

Employment History**Unified Payment Services Limited, Victoria Island, Lagos State**

Transaction Processing Specialist (Processing and Switching)

December 2023 – Present

- Lead front-end integrations with various payment solutions, ensuring seamless interaction between user interfaces and transaction systems using JavaScript.
- Implemented internal dashboards using React.js for improved transaction monitoring and reporting.
- Administrative management of NFC technology infrastructure (hardware and software).
- Testing and integration of new solutions, value-added services, and SQL scripting for report generation.
- EMV (EuroPay, MasterCard, and Visa) key management custodian for payment terminals based on ISO standards for contact and contactless cards.
- Administrative support to helpdesk, external customers, and internal staff.

Key Accomplishments:

- Built and deployed the B.I Server for report generation.
- Implemented new QOC reporting style for quarterly reports.
- Executed pin selection/pin change for Access Bank.

- Set up and configured ATMs for Globus Bank.
- Added transaction processing interfaces for UBA Nigeria.
- Managed cryptography (key exchange) for Access Zambia through Zambia NFS for transaction processing.

Unified Payment Services Limited, Victoria Island, Lagos State

IT Specialist (Networks/System Support)

November 2022 – October 2023

- Supported internal tools using JavaScript to automate network monitoring tasks.
- Resolved administrative and network-related issues within and outside company premises.
- Set up new users on the company domain and managed all software installations.
- Configured and deployed network switches.
- Deployed data security software (Trend Micro) to over 700 users on the network.

Key Accomplishments:

- Migrated all active users on the domain from UPDC1 to UPDC2.
- Set up new user workstations for over 300 users.
- Configured and deployed network switches.
- Deployed data security software (Trend Micro) to over 700 users.
- Successfully rolled out new technologies.

Nigerian Television Authority, Abeere, Osogbo, Osun State

Intern (System Support)

May 2022 – October 2022

- Resolved broadcasting/transmitting related issues within the station.
- Assisted in effective operations in the control room.
- Participated in configuring the multiplexer and various televising devices.
- Assisted in the collection and installation of new computer systems.
